

## Advance CKD Centre - Chronic and critical Kidney patient care centre

- » A much needed highly subsidised advance critical kidney care centre to offer specialised Sustained low-efficiency dialysis (SLED) a hybrid renal replacement therapy that is used in critically ill patients with acute kidney injury (AKI). It's characterized by longer treatment durations (6-12 hours)
- » Plasmapheresis- It is also known as therapeutic plasma exchange, a medical procedure where the plasma is separated from the blood cells and then returned to the body after the plasma has been treated or replaced.

**Amount To Be Raised: ₹ 7.5 Lakhs**

**Our Commitment: ₹ 25 Lakhs**

### Impact:

The impact of a specialised n highly subsidised service which does not exist in most parts of the city will be determined over time
