

NIGHT SCHOOL TRANSFORMATION PROGRAM

NGO Partner : Masoom Foundation

Project Size : 26,52,000/-

Project Summary:

Helping adults from under privileged section who have missed their education, to complete their SSC (10th) standard level. This would further help them get a respect in society and better value employments.

Our club have initially decided to sponsor 5 night schools through Masoom Foundation. We would provide financial coverage and provide guidance as required by Masoom so they can improve the registration and increased attendance of the students.

There are many students and even adults (men / women) who are forced to leave their school education mid-way due to financial and home related pressures. Many the girls get married at early age and miss completing their 10th grade.

This platform provides a completely 'no cost opportunity' for these people to complete their education and get 10th Grade certification from Maharashtra board on successful passing. The project scope covers teachers fees, books, lab equipments and snacks to all those who attend the night school.

Project Impact and Challenges:

1. Total student enrolment is 403, which is higher than the estimated number 340
2. Grant amount spend is well within the estimates, with room for more activities
3. We expect high % pass out for SCC exams this year from these schools

Challenges :

1. Attendance of many students below required 70%, on account of their family and financial challenges

Key Insights and heart touching observations:

1. Students participation is even from parents of infant and small children. They come with their children to attend the night school
2. We saw mother in 8th standard studying, while their children are in 10th std studying.
3. Students are working as newspaper distributors, milk distribution and whole day work, then coming to attend school
