

## **Breast Cancer Prevention.**

**NGO Partner : Somaiya Hospital**

**Project size : Rs 32 lakhs**

### **Project summary:**

Mammography screening Machine at Somaiya Hospital was set up in 2020 to provide screening at cost of Rs 225 for the poor in the community.

### **Project Impact and Challenges:**

Since the project was implemented just before covid, there was not much awareness and utilisation. However, since the past one year, utilisation has improved and during the last 2 years almost 600 screenings have been done at subsidized rates.

More awareness for the need for screening is required and camps need to be held regularly.
