

COMPUTER LAB FOR STUDENTS

NGO Partner: SPRJ Kanyashala Charitable Trust

Project Size: Rs 22 lacs

Project Summary:

There are 900 girl students of both Gujarati and English medium studying at SPRJ. Most of these students are from economically challenged background and being first generation learners, they do not have motivation or means to pursue education, leave alone computer education. If these girls are educated & enriched with required and requisite computer skills along with normal education, they can become the lifeline of their family and the nation. With this background, 25 computers were donated in May 2022.

Impact & Challenges:

The provision of state-of-the-art computers and latest software has enthused students all around. The school has ensured training programme beyond the curriculum to enable the students for the real world.
