

Swasth Foundation

Location - Mumbai

Project Value - ₹ 27 lakhs

Swasth aims to raise healthcare awareness among economically weaker section (EWS) families, particularly regarding chronic lifestyle diseases like hypertension and diabetes.

We aim to provide affordable treatment and offer monthly medications for BP and diabetes at a minimal cost, encouraging regular health checkups close to home to prevent complications.

It's essential to educate them about the silent, life-long nature of these diseases and the importance of consistent follow-up visits.
